

Emergency motion

E1. Iran

Unite Liverpool NW 0538 branch

This branch notes with growing tension the nature of reports in National and international media about Iran. In light of the recent IAEA dossier, this branch notes this is not the first time that a (dodgy) dossier as been used as a premise to justify imperialistic intervention in the Middle East.

We believe that such actions would cause an unreasonable and unnecessary risk to human life and stability in the Middle East and Western/Moslem relations. We remain deeply suspicious of the motives of some of those advocating such intervention.

As a result Liverpool NW0538 Unite oppose such intervention.

This branch calls upon LRC conference to reassert its position in opposition to any actions of aggression towards Iran, either by the UN/NATO mandate or by a single rogue nation.
