

MODEL MOTION KEEP THE POST PUBLIC

“That this agrees that the Royal Mail provides a vital public service to our communities, both rural and urban alike. This is extremely concerned that the coalition Government intends to bring forward legislation to break up and privatise the Royal Mail. This is convinced that privatisation will lead to widespread closure of Post Offices, will jeopardise the ‘one price goes anywhere’ universal service and will lead to increased prices whilst drastically reducing services to small businesses, domestic customers, vulnerable groups and communities. There is no public mandate for the privatisation of the Royal Mail and there is no public support for such a move.

In light of that this commits to opposing plans to break up and privatise the Royal Mail and to support the Keep the Post Public coalition.”
